Ahmed Adel Fahmy Hassan

Tel: +201010549351 | email: ahmed.hedia@outlook.com | Address: Cairo- Egypt | Linkedin profile: https://www.linkedin.com/in/ahmedhedia/

Education

Suez Canal University – Ismailia, Egypt — **September 2014- May 2019**

- **Graduated from Computer Science and Informatics faculty** — **Grade: Good.**
- **Graduation Project: Decentralized Voting Application Using Ethereum (Public Blockchain)** — **Grade: Excellent.**

Experience

TRT — *Singapore - Singapore*

Consulting Service Partner (Part-time Employee) — *September 2026 - Present*

- **L3/L4 Advanced Escalation Management:** Act as the final tier of technical escalation for the TRT Technical Services Team, resolving complex, high-priority issues requiring deep system diagnostics.
- **Root-Cause & System Log Analysis:** Analyze complex system logs and operational data to pinpoint underlying root causes and deliver permanent technical resolutions.
- **Cross-Tier Remote Troubleshooting:** Partner directly with L1 and L2 support teams using remote tools to diagnose and resolve complex hardware, software, and configuration failures.
- **Architecture & Design Consultation:** Provide expert technical advice and consultative guidance on system architecture and project design for incoming business opportunities.
- **Knowledge Base Creation & Maintenance:** Author, review, and maintain comprehensive technical articles, troubleshooting guides, and knowledge base documentation.
- **SOP & Runbook Standardization:** Develop and continually update Standard Operating Procedures (SOPs) and operational runbooks to ensure team-wide consistency.
- **Technical Advisory & Subject Matter Expertise:** Serve as a domain expert across backend technologies, supporting both active operational needs and strategic technical initiatives.

IBM — *Cairo - Egypt*

AIX Support Engineer (LVM/Install/Commands/Boot/ Open Source Software) — *February 2021 - Present*

- **End-to-End Problem Resolution & Diagnosis:** Deliver timely remote technical support with full end-to-end ownership, analyzing diagnostic data (traces, dumps), interpreting product documentation and manuals, and applying known fixes to resolve software issues.
- **Client Relationship & Satisfaction Management:** Maintain strong client relationships and high satisfaction under pressure by demonstrating excellent technical and interpersonal soft skills.
- **Process Compliance, Documentation, & Security:** Adhere to standard support methodologies, incident management processes, and data security protocols while accurately logging all customer interactions and activities.
- **Cross-Functional & International Collaboration:** Work seamlessly with international teams, other support centers, and internal business units to expedite problem resolution.
- **Operational Availability & Schedule Adherence:** Maintain reliable availability by adhering to structured work schedules, including support for 24x7 shift operations and on-call coverage.
- **Knowledge Sharing & Mentorship:** Contribute to team scalability and customer self-service by publishing Tech-Docs for common issues and leading technical training sessions for new hires.

Advanced Computer Technology (ACT) — *Cairo - Egypt*

Technical Support Associate — *March 2020 - February 2021*

- **User Support & Equipment Repair:** Diagnose computer problems, guide customers and employees toward effective solutions, and test and repair faulty hardware/equipment.
- **Incident Logging & Trend Analysis:** Maintain accurate records of all user queries and analyze call logs to identify recurring trends and underlying systemic issues.
- **Escalation & Knowledge Management:** Coordinate on-site visits with field engineers for severe issues while updating self-help documentation to empower user self-service.

Internships

IBM — *Cairo - Egypt*

Artificial Intelligence Analyst Trainee — *June 2019 - July 2019*

Earned the IBM AI Analyst Mastery Award (2019) by building intelligent chatbots and extracting document insights using IBM Cloud, Watson Assistant, and Knowledge Studio.

DELL EMC — *Cairo - Egypt*

Information Storage and Management Intern — *July 2017 - August 2017*

Gained hands-on data center expertise in storage and networking, including LUN creation, distribution, and corporate deployment of Dell EMC products.

Microsoft — *Cairo - Egypt*

Xamarin and Microsoft Azure Developer intern — *June 2017 - July 2017*

Secured 1st place in the internship graduation project competition by developing cross-platform Xamarin applications and deploying cloud solutions on Microsoft Azure.

Extracurricular Activities

NASA SPACE APPS Cairo — *Cairo - Egypt*
Competition Team Member — *May2020 - January 2020*
Led hackathon and bootcamp operations by designing manuals and agendas, recruiting speakers and judges, and establishing the evaluation system, mentor orientations, and participant support.

IBM — *Cairo - Egypt*
Digital Nation Africa (D-NA) Ambassador — July *2018 - September 2019*
Served as a Digital Nation Africa Ambassador by building deep IBM platform knowledge, running introductory university workshops, and promoting free IBM Cloud access to expand student outreach.

IEEE Suez Canal University Student Branch — *Ismailia - Egypt*
Vice Chairman — *September 2017 - September 2018*
Supported committee operations by managing program and membership tasks, arranging logistics, and performing leadership responsibilities in the Chair's absence.

AIESEC — *Suez - Egypt*
Team Leader in OGCDP (Outgoing Global Committee for Development Program) — *June 2014 -March2015*
Promoted the Global Citizen Program and onboarded international interns by delivering AIESEC orientations and program inductions.

Skills and Technologies

Python – Bash/KSH Scripting – LVM (Logical Volume Manager) – AIX (Linux/UNIX)	***Advanced***
Network – Virtualization – Git – Vagrant	***Intermediate***
Microsoft Azure- IBM Cloud – AWS – C/C++ - Storage – Docker - K8S	***Beginner***

Projects

Hosting a website using amazon S3: *Hosting a static website on Amazon Simple Storage Service (S3) provides a serverless, highly durable, and cost-effective architecture for delivering static web assets (HTML, CSS, JavaScript, and media) directly to end users without maintaining web servers.*

Building VPCs with Peering and Log Monitoring: *Designed and deployed a secure cross-VPC architecture on AWS by establishing private VPC peering between isolated networks with unique CIDRs, routing tables, and security groups. Validated internal EC2 connectivity over private IPs and configured VPC Flow Logs with CloudWatch to monitor and visualize cross-network traffic patterns.*

Connecting webapp with AuroraDB: *This project is a cloud-based web application that connects an EC2-hosted app to Amazon Aurora DB using PHP, Apache, and MySQL-compatible tools. It demonstrates database integration, web hosting, and data management in an AWS environment. The app stores user information and supports CRUD-style interaction with the database. It also includes testing and validation by querying the Aurora instance directly. Overall, it highlights practical experience in AWS, web development, and relational database connectivity.*

Query Data with DynamoDB: *Built a DynamoDB-based project focused on modeling, storing, and querying data efficiently in a NoSQL environment by designing multiple interconnected tables, using partition and sort keys for optimized lookups, and synchronizing updates across related records. The project highlights hands-on experience with AWS DynamoDB querying, schema design, projection expressions, transactions, and CLI-based operations, demonstrating the ability to build reliable, scalable database workflows while understanding the trade-offs and limitations of NoSQL data modeling.*

Certificates and Badges

2026 IBMer watsonx Challenge	28 July 2026
IBMi Foundations	13 March 2026
IBM Growth Behavior	17 February 2026
IBM Power Systems Power10 Foundational	2 December 2025
IBM PowerVS Technical Practitioner	20 November 2025
Practical Introduction to Quantum-Safe Cryptography	29 October 2025
Power Development Software Support Professional	15 May 2025
InstructLab: Democratizing AI Models at Scale	26 December 2024
Korn and Bash Shell Scripting Specialist	4 October 2024
IBM watsonx.ai Technical Essentials	26 May 2024
McKinsey Forward Program	18 April 2024
Interskill - Cloud Foundations	7 December 2023
OPSWAT Introduction to Critical Infrastructure Protection (ICIP)	7 July 2023
IBM Quantum Conversations	2 July 2023
Cognitive Practitioner	17 April 2023
Interskill - AIX Systems Administrator - Experienced	9 March 2023
Trustworthy AI and AI Ethics	21 February 2023
Interskill - AIX Systems Administrator - Experienced	9 March 2023
Cognitive Practitioner	17 April 2023
Power Systems for AIX I: LPAR Configuration and Planning	13 October 2022
IBM Agile Explorer	19 September 2022
Interskill - AIX Systems Administrator - Fundamentals for UNIX Specialists	4 August 2022
Hybrid Cloud Intro	5 June 2022
IBM Blockchain Foundation Developer V2	6 April 2021
Interskill - AIX System Administrator - Fundamentals	6 March 2021
Government Industry Intro	5 March 2021
Deploy a Micro services-Based web Application	8 October 2020
Multi-Cloud Networking Associate (MCNA)	18 September 2020
Getting Started with IBM Cloud V2 (Issued by IBM)	10 September 2020
Data Understanding and Preparation (Issued by IBM)	17 January 2020
Data Science Fundamentals (Issued by IBM)	13 January 2020
Artificial Intelligence Analyst 2019 Mastery Award.(Issued by IBM)	30 June 2019
